

PRATEEK KUMAR JENA

Lead Frontend Engineer | React · TypeScript · Micro Frontend Architecture

Bengaluru, India | +91-8123888117 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend Engineer with 7+ years building large-scale consumer and enterprise web products in React and TypeScript, across banking, telecom, and digital platforms. Led architecture and performance initiatives that cut build times by 35%, lifted Lighthouse scores above 90, and delivered shared component libraries adopted by 4+ engineering teams. Strong track record leading platform migrations (Webpack, JS→TS) and mentoring teams through micro frontend adoption.

SKILLS

Frontend: React, TypeScript, JavaScript, SCSS, Jest, React Testing Library, Cypress

State Management: Redux, Redux-Saga, Redux-Thunk, TanStack Query

Architecture: Micro Frontends, Module Federation

Cloud: AWS (Lambda, S3, CloudFront, CloudWatch, IAM)

Backend: Node.js, Express

Tools: Webpack, Git, CI/CD, Linux

WORK EXPERIENCE

Lead Engineer — Launch by NTT DATA

Feb 2024 – Present

- Lead frontend architecture for integrating the Paymentus billing platform into enterprise utility products used by multiple client accounts.
- Designed and implemented a micro frontend architecture using Module Federation, enabling 4+ teams to deploy independently and cutting cross-team release coordination overhead.
- Modernized Webpack build pipeline and dependency graph, reducing front-end build time by 35%.
- Built shared component libraries adopted across 4+ engineering teams, improving UI consistency and cutting duplicate development effort.
- Achieved 90+ Lighthouse scores across performance, accessibility, and best practices; reduced production bundle size via code splitting and compression.

Tech: React, TypeScript, TanStack Query, Redux, SCSS

Frontend Engineer — Development Bank of Singapore (DBS)

May 2022 – Jan 2024

- Built and maintained secure internet banking payment workflows (FD, IMPS, NEFT) used in production by retail banking customers.
- Led migration from Webpack 3 to Webpack 5, cutting build times by 35% and improving CI pipeline stability.
- Led JavaScript-to-TypeScript migration across multiple modules, reducing runtime defects and improving long-term code quality.
- Partnered with security, QA, and backend teams to maintain production reliability and regulatory compliance for banking workflows.

Tech: React, Redux, Context API, SASS

Frontend Engineer — Cognizant (Client: Verizon)

Jul 2020 – Mar 2022

- Built customer authentication and digital engagement workflows for Verizon's customer-facing platforms.
- Improved navigation performance and onboarding experience through routing optimization and reusable UI architecture.
- Delivered API integrations, form validation systems, and accessibility improvements across customer-facing applications.

Tech: React, Redux, Redux-Saga

Full Stack Developer — Sparity

Jul 2019 – May 2020

- Built scalable multi-module dashboards using React, Node.js, and Express.

- Improved real-time data synchronization and state management using RxJS patterns.

Tech: React, RxJS, Node.js, Express

Frontend Developer — PeopleLink Unified Communications

Sep 2017 – Nov 2018

- Developed conferencing UI components and deployment automation for enterprise communication products.
- Contributed to Linux deployment pipelines and cloud dashboard integrations across AWS and Azure.

Tech: React, JavaScript, Linux, AWS, Azure

PERSONAL PROJECTS

- Dependency Tracker CLI — Node.js CLI tool for auditing and flagging outdated/vulnerable npm dependencies across projects.
- Real-Time News Aggregator — React app pulling and ranking live news from multiple APIs with real-time updates.
- Webpack React CLI Toolkit — Custom CLI for scaffolding React projects with a pre-optimized Webpack configuration.

EDUCATION

B.Tech, Government College of Engineering, Keonjhar, Odisha, India — CGPA 7.8

12th — BCST, Bhubaneswar, Odisha, India — 80%

10th — MPC High School, Betnoti, India — 88%

LANGUAGES

English — Fluent
